

Visitor screening questions

This guidance is for clinical and non-clinical staff to enable screening of visitors prior to, or upon entry to a healthcare facility

Today or in the last 14 days	About the visitor	
		Have you had a high temperature?
		Have you had any of the following symptoms: a new, continuous cough or a loss of, or change to, your sense of smell or taste?
		Have you tested positive for COVID-19?
		Have you been contacted by the NHS test and trace services and asked to self-isolate?
		Are you self-isolating after returning or entering the UK?
	About the visitor's household and contacts	
		Has anyone in your household or your close contacts had (or does anyone currently have): a high temperature, a new continuous cough or a loss of, or change to, their sense of taste or smell?
	Has anyone in your household or your close contacts tested positive for COVID-19?	

If the answer to any of these questions is yes, the visitor cannot visit a patient here until they have completed their self-isolation requirements
